

# JEFFREY

## GENERAL DESCRIPTION

The JEFFREY lamp serves its primary purpose as a lighting fixture, while the PET-felt material reduces noise levels in a room, creating a calmer and more naturally pleasant ambiance. This lamp’s key attribute is its simplicity, expressed through clear and comprehensible geometric forms.

Furthermore, a practical adjoining panel allows for multiple lamp combinations in different pattern sets, adaptable to the interior layout, enhancing the soundproofing effect.

Dan Vakhrameyev, the designer behind the JEFFREY lamp, aimed to visually highlight the layered structure of the sliced material, creating a strong impression of graphical symmetry.

The collection is presented in 6 thoughtfully selected colors to match the general +kouple palette.
